

Workplace Mentoring

Being a Big

Benefits to starting a Workplace Mentoring Program at your company

1

Unique Volunteer Opportunity

Workplace Mentoring programs take place in a conference room or cafeteria at your corporate office. Students are transported to the corporate site while employee volunteers leave their cubicle or office for this bi-monthly mentoring program.

2

Our Process

We employ our Service Delivery Model where professionally trained staff recruit, screen, train, match and support the volunteer and child every step of the way.

3

Turnkey Approach

Our program team creates a timeline/work-plan for each program to ensure our corporate partners understand the expectations of their employees.

4

Impact on Youth

Independent studies prove to help improve the odds that students in our program will avoid risk taking behaviors, perform better in school and succeed as adults.

5

Employee Feedback

92% of Workplace Mentoring Bigs say they are proud their company support volunteer programs.

6

Measured Metrics

We gather report cards and survey our volunteers, students and teachers to measure the progress of our youth and their matches. We provide the results of this data to our corporate partners each year.
